These are my opinions...

Quotes

“Can you guys please give Subversion on Google Code the ability to hide specific branches?”

Some Dude at Google I/O, 2008

“Can you guys make it possible to create open source projects that start out hidden to the world, then get ‘revealed’ when they’re ready?”

Some Other Dude at Google I/O, 2008

“Hi, I want to rewrite all my code from scratch,
can you please wipe all the history?”

Some Guy on our mailing list

Can you spot the theme?

The Genius Myth

“There’s a pervasive elitism at work in the programming community. Add anonymity to the mix, and everyone is suddenly elite.”

Kyle K (Commenting on Ben’s Blog)

Why do people buy
products endorsed by celebrities?

There is no genius.

Insecurity

It Inhibits Progress

Google™

No, really,
It Inhibits Progress

“You are not a beautiful or unique snowflake.
You're the same decaying organic matter as
everything else.”

Tyler Durden, *Fight Club*

Avoiding the Trap

Lose the Ego

Criticism is not Evil

Embrace Failure

Iterate Quickly

Practice is Key

Be a Small Fish

Be Influenced

Be Vulnerable

Tools Matter

“You cannot apply a technological solution to a sociological problem...”

Internet Adage

Google™

...usually

...but default behaviors
matter a lot.

Examples

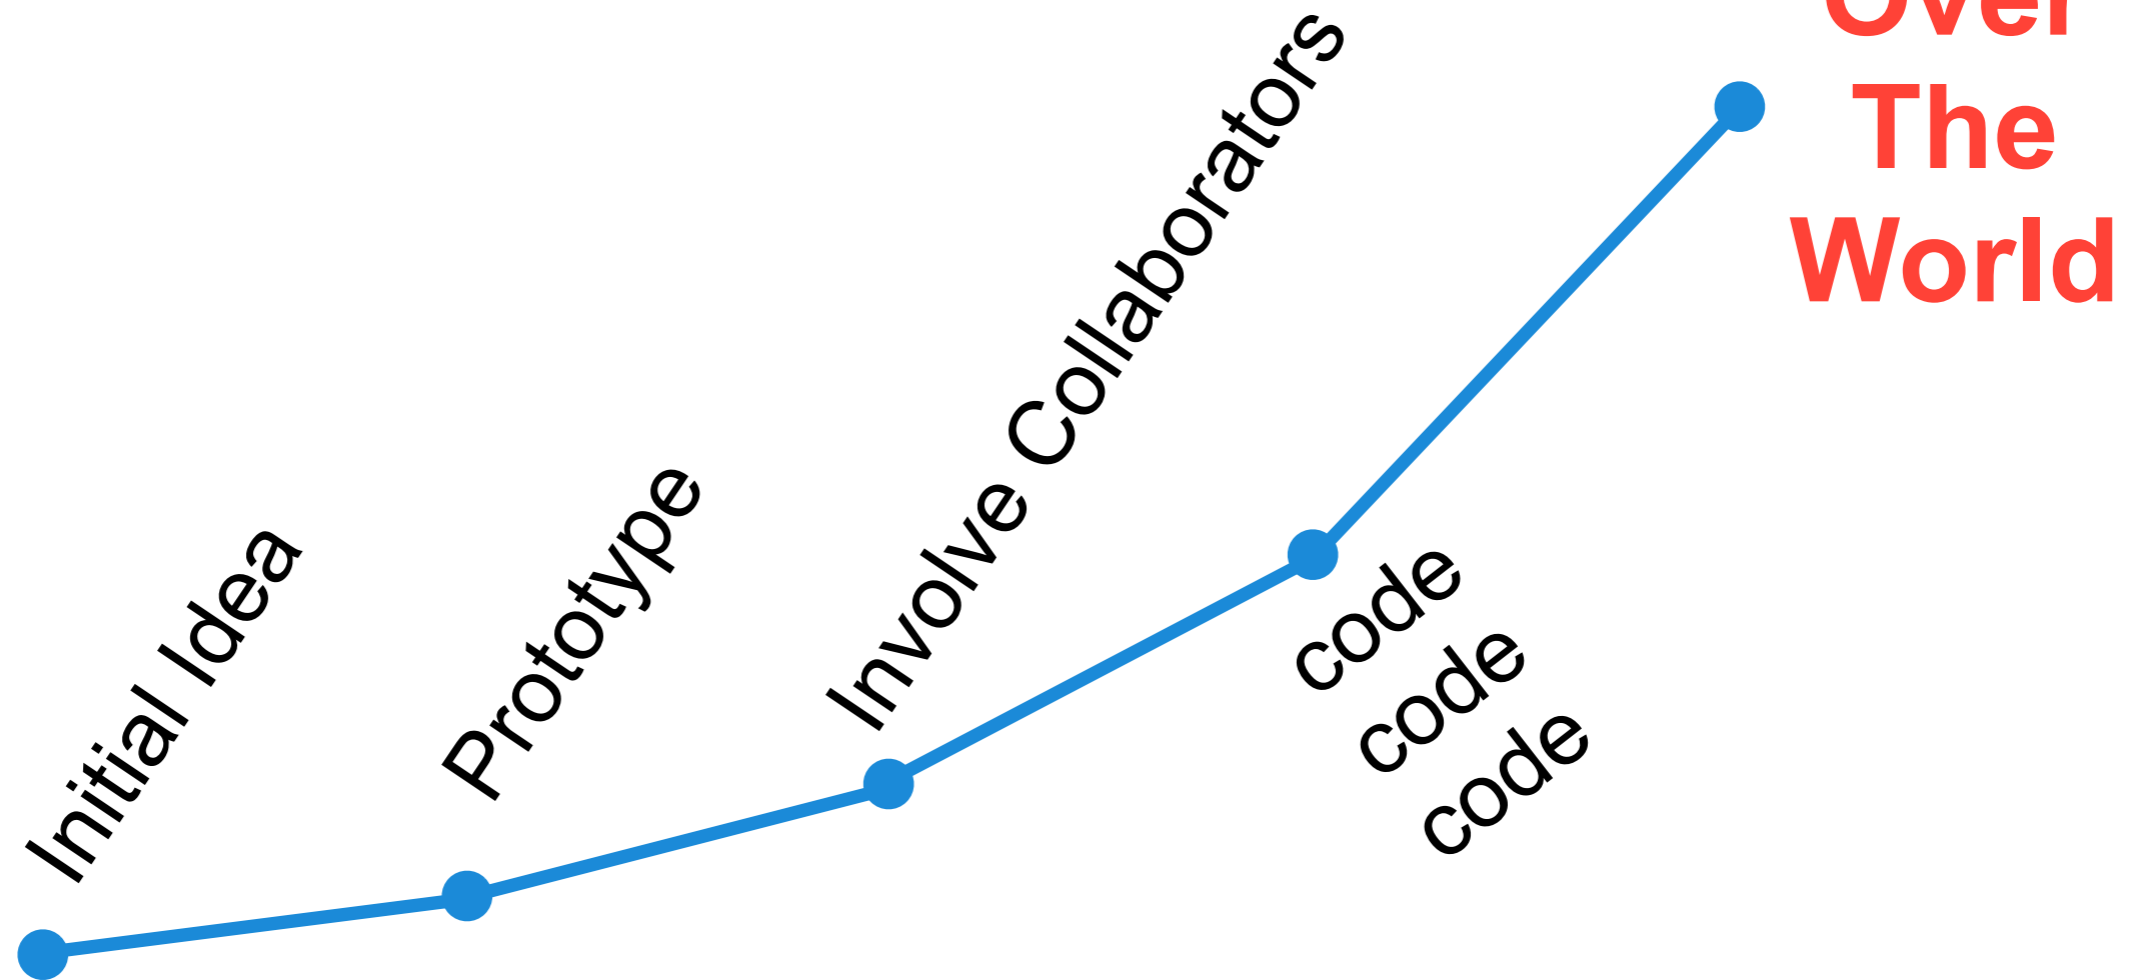

Moral

When Do I Collaborate?

Project Evolution

Where should the third
milestone go?

Too late

Too early

Sweet Spot!

Case Study: Subversion

Case Study: Ben & Fitz

Obligatory Summary Slide

Don't try to be a genius

Collaborate early and often

Pay attention to default tool behaviors

Pay attention to timing

But here's the secret...

...if you do all these things

People Will **Think** You're a Genius

Google = mc^2
